code translation*

A screenshot of the FitTrack Pro mobile application's dashboard. The top navigation bar shows the app's logo and the user's name, John. Below the header, there are four main sections: 'Dashboard' (selected), 'Exercises', 'Workouts', and 'Community'. Each section has a corresponding icon and a count of items: 12 for Dashboard, 10 for Exercises, 10 for Workouts, and 10 for Community. At the bottom of the screen, there is a large button labeled 'Start New Workout'.

The image displays two versions of a mobile application interface. On the left is a hand-drawn wireframe, and on the right is a digital screenshot of the final product. Both interfaces feature a top navigation bar with icons for Home, Community, Achievements, and Settings. Below this is a grid of four items, each with a placeholder icon and the label 'xxxx'. At the bottom is a large button labeled 'Workout Progress'. The right side shows the actual application's interface, which includes a top status bar with battery level at 15% and a main screen titled 'Workout Progress'. This screen contains a bar chart titled 'Weekly Workout Progress' with the y-axis ranging from 30 to 80. The chart displays six bars representing different weeks, with approximate values of 10, 70, 65, 65, 75, and 60.

workflows, DeepFlow has achieved artificial intelligence, not only improving pool data queries.

show me a demo

To create a demo DApp that connects to a wallet on the Binance Smart Chain (BSC), you can use the library for interacting with the Ethereum blockchain and compatible networks like BSC.

Here's a simple example of how you can connect to a wallet using `ethers.js`:

HTML

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>BSC Wallet Connect</title>
</head>
<body>
<button id="BSCConnect" type="button">BSC Connect to BSC Wallet</button>
<button id="connectWallet" type="button">Connect Wallet</button>
<p id="walletAddress"></p>
<script src="https://cdn.ethers.io/lib/ethers.js/v5.3.1@20230208164937.1f3a43d9.min.js"></script>
<script src="https://github.com/ethers-io/ethers.js/blob/main/examples/wallet-connect.js?raw=true"></script>
<script>
// Your code here
</script>
</body>

```

TALK TO ASK

Talk to Bot

The screenshot shows the BSC Knowledge Base website with two main sections displayed:

- NFT Ecosystem**: Described as "Official Binance NFT marketplace supporting cross-chain NFT trading, minting, and listing." It includes links for "Anonix NFT", "Element Market", and "nftTrade".
- GameFi Ecosystem**: Described as "Official GameFi ecosystem connecting NFTs and games." It includes links for "Avalanche", "Avalanche NFT", "Cryptid Games", "NFT Games", and "World Games".

At the bottom, there is a search bar with the placeholder "Search with BSC Knowledge Base...".
